**Section 1: Immediate Harm Factors**

Directions: The following factors are behaviors or conditions that may be associated with a child being in immediate danger of serious harm. Identify the presence of absence of each factor by making either "yes" or "no". Note: The vulnerability of each child needs to be considered throughout the assessment. Children ages zero through six cannot protect themselves. For older children, inability to protect themselves could result from diminished mental or physical capacity or repeated victimization.

Yes No

1. Caretaker caused serious physical harm to the child, or made a plausible threat to cause serious physical harm in the current investigation indicated by (check all that apply):
- Serious injury or abuse to child other than accidental.
  - Death of a child due to abuse or neglect.
  - Care taker fears that s/he will maltreat the child.
  - Threat to cause harm or retaliate against the child.
  - Excessive discipline or physical force.
  - Drug-affected infant/child.
  - Methamphetamine lab exposure.
2. Child sexual abuse is suspected, and circumstances suggest that the child's safety may be of immediate concern.
3. Caretaker fails to protect the child from serious harm or threatened harm by others. This may include physical abuse, sexual abuse, or neglect.
4. Caretaker's explanation for the injury to the child is questionable or inconsistent with the type of injury, and the nature of the injury suggests that the child's safety may be of immediate concern.
5. The family refuses access to the child, or there is reason to believe that the family is about to flee.
6. Caretaker does not meet the child's immediate needs for supervision, food, clothing, and/or medical or mental health care.
7. The physical living conditions are hazardous and immediately threatening to the health and/or safety of the child.
8. Caretaker's current substance abuse seriously impairs his/her ability to supervise, protect, or care for the child.
9. Domestic violence exists in the home and poses a risk of serious physical and/or emotional harm to the child.

## Tennessee Department of Children's Services

### SDM™ Safety Assessment

10. Caretaker describes the child in predominantly negative terms or acts toward the child in negative ways that result in the child being a danger to self or others, acting out aggressively, or being severely withdrawn and/or suicidal.
11. Caretaker's emotional stability, developmental status, or cognitive deficiency seriously impairs his/her current ability to supervise, protect, or care for the child.
12. There is a pattern of prior investigations and/or behavior that suggests an escalating threat to child safety.
13. Other (specify)

**If no immediate harm factors are observed, proceed to Section 3**

#### Section 2: Safety Interventions

If no immediate harm factors are present, go to Section 3. If one or more immediate harm factors are present, consider whether safety interventions one through eight will allow the child to remain in the home for the present time. Check the item number for all safety interventions that will be implemented. If there are no available safety interventions that would allow the child to remain in the home, indicate by checking item nine or ten, and follow procedures for initiating a voluntary agreement or taking the child into protective custody. Mark all that apply:

#### Non-Protective Custody Interventions:

1. Intervention or direct services by worker as part of a safety plan.
2. Use of family, neighbors, or other individuals in the community as safety resources.
3. Use of community agencies or services as immediate safety resources.
4. Have caretaker appropriately protect the victim from the alleged perpetrator.
5. Have the alleged perpetrator leave the home, either voluntarily or in response to legal action.
6. Have the non-offending caretaker move to a safe environment with the child.
7. Legal action planned or initiated - child remains in the home.
8. Other (Specify): child will be hospitalized until CFTM

#### Protective Custody Interventions:

9. Caretaker signs a voluntary placement agreement that places the child in Department of Children Services (DCS) custody.
10. Child placed in protective custody pursuant to 37-1-113 and 37-1-117 because no interventions are available to adequately ensure the child's safety.

**Tennessee Department of Children's Services**  
**SDM™ Safety Assessment**

**Section 3: Safety Decision**

Identify the safety decision. This decision should be based on the assessment of all immediate harm factors, safety interventions, and any other information known about the family. Mark only one.

- 1. **Safe.** No immediate harm factors were identified at this time. Based on currently available information, there are no children likely to be in immediate danger of serious harm.
- 2. **Conditionally Safe.** One or more immediate harm factors are present, and one or more protecting interventions #1-8 have been planned or taken. Based on protecting interventions, no protective custody action is necessary at this time.
- 3. **Unsafe.** One or more immediate harm factors are present, and placement is the only protecting intervention (#9 or #10) possible for one or more children. Without placement, one or more children will likely be in danger of immediate or serious harm.
  - All children placed.
  - One or more children being placed in protective custody, but others remain in the home. Complete the status of each child below only when one or more children are being removed, but others remain in the home:
